

**Calvert Cemetery
Monument Foundation Requirements**

DRAFT – June 2009

1. All monuments shall be set on a poured-concrete foundation constructed of unreinforced 3000 psi concrete.
2. All foundations shall be constructed to be below grade and no part of the foundation shall be visible once the monument has been set and the area restored.
3. Foundations shall extend 3 inches from the outer edge of the monument on all sides.
4. Foundation depths shall be as follows:

<u>Monument Height</u>	<u>Foundation Depth</u>
0 to 12"	18"
13" to 48"	24"
>48"	36"

5. All excavated material shall be removed and disposed of onsite at a location specified by the cemetery sexton.
6. The cemetery sexton or designated representative shall approve the location and configuration of the monument prior to initiating construction.
