

# WHAT DO YOU DO IF YOUR SEWER STOPS UP?

**(1) FIRST-CALL  
CALVERT WATER & SEWER**  
We'll check the main sewer.

**MAIN SEWER IN  
EASEMENT IN YARD**

**MAIN SEWER  
IN STREET**

**(2)**  
If the main is OK,  
we recommend that you then call a  
plumbing or sewer contractor

**(3)** If your contractor or plumber cannot  
unplug a stoppage due to a defect in the  
lateral portion of the line on CCWS's public  
easement, we will need to meet with the  
plumber to verify the location of the defect.  
Give us another call.

NOTE: Although there is no extra charge for our services  
(the work is financed by sewer bills), we will not assume  
the cost of your contractor's call when the stoppage is in  
your service lateral.

**REMEMBER: Call Calvert Water & Sewer First!**
